Public
Service
Association, Inc.

About the FPSA

Thank you for your interest in the Florida Public Service Association, Inc. (FPSA). This exciting career and technical student organization was established in 1990. As of 2017 the popularity of the FPSA among students and teachers has grown; membership is over 1000 statewide.

FPSA is the CTSO recognized by the Florida Department of Education for Criminal Justice, First Responder, and Firefighter.

FPSA chapters work with professional groups, community colleges, universities, local businesses, chambers of commerce, law enforcement agencies, court systems and correctional systems to instill a spirit of community and service in participating high school students. All students enrolled in public service programs in Florida are invited to join.

Benefits to Students

FPSA enables students to explore career opportunities in the public service fields of criminal justice and firefighting.

Through club activities, members learn real life information about public service occupations. They also have the opportunities to develop and experience their own talents in a chosen field.

As a result, students experience personal growth, enhancement of social skills, and a strengthening of their own self confidence and abilities—attributes they can use throughout their lives.

State Leadership Conference

The FPSA hosts two leadership conferences yearly. The first is the State Leadership Conference held in March of every year. This conference is home to more than 30 competitions. Students have the opportunities to compete against other students from around the state of Florida, and test their public service skills through group activities. The competitions are listed on the back or on our website at www.myfpsa.us.

The second conference is a State Leadership Conference for the state leadership board. This summer conference teaches the state student board valuable leadership skills that will help them not only run the student organization, but also skills that they will take with them throughout life to make them successful in the public service field.

Curriculum and activities at both conferences are designed to help students strengthen their leadership and communication skills, develop goal setting and positive thinking, and further improve self confidence. Attendees come away from these conference with new insight, learning to view problems as challenges and to appreciate their personal freedoms.
